

Beware of visits from people claiming to be from our company!

Recently our company has received information that someone claiming to be from our company or to be one of our representatives visited a company in Vietnam and attempted to engage in trading by displaying a contract stating that one of our subsidiaries is constructing a new plant.

Having checked our records, we learned that the individual in question has absolutely no relation to our company and the contract is fictitious, using a forged seal similar to that of our company.

If you receive a visit to this effect, be aware that it may be fraudulent, and please contact us immediately if you find anything suspicious in terms of the association with our company.
